AN ELEGANT COMBINATION OF SPACE & HYGIENE

Quality, Craftsmanship, Integrity, Experience, Service.

CELEBRATING
20
YEARS

VISION

To maintain and strengthen our position nationally and globally in Home Décor space with an array of new innovative products and adding value to life.

MISSION

We are committed to being the market leader by constantly innovating and delivering newer products and services.

We aim to set the highest possible standard in quality, value and customer satisfaction.

Over 20 Years of Expertise in Domestic Toilet Cubicle Interiors & Architectural Fixtures

Elevate Your Spaces with Timeless Cladding Solutions.

Best company to contact for getting Rectangular HPL Toilet Cubicle, HPL Interior Wall Cladding, Nylon Toilet Cubicle Partition, Acrylic Solid Sheet, Exterior Wall Cladding Services, and many other products and services.

SVP Designs And Architrade is a renowned company in the markets for wall cladding products and services. We started in 2022 and since then have been adding a variety to our portfolio and meeting the market requirements. As a trader, we are extensively loved by customers for our HPL Interior Wall Cladding, Rectangular HPL Toilet Cubicle, Acrylic Solid Sheet, Nylon Toilet Cubicle Partition, and Acrylic Solid Surface. We are also famous for our Exterior Wall Cladding Services, Ceramic Wall Cladding Services, Weatherboard Wall Cladding Services, and solutions as Residential Interior Decorators.

Wall claddings that are extensively trending these days are basically a decorative covering to the surface of wall to improve the aesthetic appearance. Our goal at SVP Designs and Architrade is to have the walls appear to be constructed of a different material than what is really used. We bring the new texture and uniqueness to a piece of your kitchen or living area with a simple and hassle-free method of wall cladding.

So what are you waiting for? Transform your walls from boring to amazing. They are, after all, the ideal medium on which to convey your artistic inclinations. Reach out to us right now!

CUBICLE SYSTEMS

disadvantages of wet system

- Cleaning of floor becomes difficult
- Dirt and stains easily settle down on the bottom because of its porous surface
- Tile designs can go out of production making its replacement difficult
- Since the grout joints are porous they can easily absorb pungent smell
- Loss of space-Usage of 6' x 6" thick walls result in loss of 3 sq.ft area per partition
- Load of building is high
- No means of natural ventilation is provided

advantages of dry system

- Economy of space-The partition panels are only 12mm or 18mm thick as compared to 150mm thick brick wall
- Economy of load-Partitioning systems reduces the load on building as compared to the usage of brick wall
- Reduced installation time-4 cubicles can be setup in a day
- Neatness-Since no wet work is involved
- Proper air ventilation access is provided in the designs
- Easy floor cleaning-Absence of corners doesn't let the dust to accumulate on the floor
- Vibrant range-Available in different colours and patterns

MATERIAL CONFIGURATION

compact solid grade laminate board

The compact board comprises of cellulose fibrous material (generally paper). The core is made up of layers of cellulose fibers impregnated with thermosetting Phenolic Resin and the decorative design paper on both sides impregnated with special melamine resin is manufactured under the combined application of heat (1550 C) and high pressure (specific pressure: 9 MPa/90 Bar) in a multi daylight press in which resin poly condensation takes place to give the product that extra performance through & through - strength, durability and toughness. The board is manufactured as per IS 20146.

hardware system

SS Legs

SS Shoe Box-up

Top Rail

CUBOID from STYLAM offers you an assortment of hardware fittings that endeavor to provide you with pleasing aesthetics and superior performance at an economical price. Crafted from high quality imported materials, these hardware fittings are available in polyamide, stainless steel and aluminum finishes. Within the stainless steel hardware, CUBOID offers you with two distinct variants:

- SS Grade 304 is the most versatile '18/8' stainless steel. Its malleable and ductile nature is due to its superior forming and welding characteristics. While drawing thin sheets, intermediate and post weld annealing is not needed on this grade.
- SS Grade 316 with its added content of Molybdenum and higher amount of nickel, gives

you a better quality of stainless steel that's corrosion resistant and enduring. The SS 316 performs well in sub-zero conditions and aggressive

conditions like sea water, chloride contaminated media and acetic acid vapors. With higher strength, the SS 316 has better pitting, crevice and creep resistance to corrosion.

PROseries
DURA

Simplicity is the ultimate sophistication, personified by the **DURA/PRO series** of cubicle systems. These systems come in high endurance compact laminates in multiple designs with solid stainless steel top rails and adjustable legs for efficient floor clearance.

All accessories like hooks, hinges, door knobs are in stainless steel. This series is perfect for high traffic areas like shopping malls, offices, or hospitals where one strives for simplicity, elegance and functionality.

PROPOSED APPLICATION AREAS

commercial
offices / shopping malls / commercial complex

hospitality
restaurants

healthcare
hospitals / clinics

sports
stadium / sports clubs / gym / club houses

CUBICLE SYSTEMS

THE STRUCTURE

- The adjustable legs (SS Grade 316) provided in the DURA series are anchored to the floor so that mid/end pilasters could be fixed on them.
- The base of leg is anchored to the floor with nylon plugs that are inserted into ground with SS screws
- The adjustable legs provide floor clearance of 150 mm.
- The top rail (SS Grade 304) is fixed to maintain alignment of all pilasters (mandatory in 12 mm model)
- Intermediate Panels (partitions) are fixed to rear wall and mid pilaster through SS U-channels.
- Maintaining the floor clearance of 150 mm, each door is mounted on mid/end pilaster with 3 hinges.
- Each door has one coat hook and door knob affixed.
- Door opening could be set either from inside or outside and could be fixed on left or right side.
